Simplebus is a organization that helps you to use CQRS and event sourcing in your application. Get started by reading more about these concepts [LINK](#) or by digging in to common use cases [LINK](#).

# CHAPTER 1

---

## Features and limitations

---

Why we do not have queries. Why we chose not to return thins from command handlers.

## CHAPTER 2

---

### Package design

---

Why so many packages. Refer to Matthias Noback's Principle of package design.
